

**GSA FEDERAL SUPPLY
SCHEDULE PRICE LIST**

for

PROFESSIONAL ENGINEERING SERVICES

CONTRACT NUMBER: GS-23F-0062P

Special Item No. 871-1 Strategic Planning for Technology Programs/Activity
Special Item No. 871-2 Concept Development and Requirements Analysis
Special Item No. 871-3 System Design, Engineering and Integration Special
Special Item No. 871-4 Test and Evaluation
Special Item No. 871-5 Integrated Logistics Support
Special Item No. 871-6 Acquisition and Life Cycle Management

Period Covered by Contract:
02 December 2003 through 01 December 2018
Business Size: State Funded Institution of Higher Education

University of Alabama in Huntsville
301 Sparkman Drive
Huntsville, AL 35899
www.uah.edu

Voice: 256-824-6000
Fax: 256-824-6677

On line access to contract ordering information, terms and conditions, up-to-date pricing, and the option to create an electronic delivery order are available through GSA Advantagel, a menu-driven database system. The INTERNET address for GWSA Advantage! is: <http://www.GSAAdvantage.gov>.

CUSTOMER INFORMATION

The University of Alabama in Huntsville Professional Engineering Services (PES) Schedule Price List is authorized by the Federal Supply Service under Contract Number GS-23F-0062P

1. **Table of Awarded SINs.**

SIN 871 -I Strategic Planning for Technology Programs/Activities
SIN 871 -2 Concept Development and Requirements Analysis
SIN 871 -3 System Design, Engineering and Integration
SIN 871 -4 Test and Evaluation
SIN 871-5 Integrated Logistics Support
SIN 871-6 Acquisition and Life Cycle Management

PES Labor Rates and Labor Category Definitions are provided on pages 2 to 8 of this Price List.

2. **Maximum Order:** 1,000,000.00

3. **Minimum Order:** \$100

4. **Geographic Coverage (delivery area):** Conus

5. **Point of Production:** Huntsville, Madison County, AL

6. **Discount from List Prices of Statement of Net Price:** None

7. **Quantity Discounts:** None

8. **Prompt Payment Terms:** Net 30 days

9. **Government Purchase Credit Cards:** As stipulated by Clause 552-232.79, PAYMENT BY GOVERNMENT PURCHASE CARD (MAY 2003), UAH will accept the Government purchase credit card for purchases equal to or less than the micro purchase threshold; however, UAH will not accept the government purchase credit card for purchases over the micro purchase threshold.

10. **Foreign Items:** None

11. **Time of Delivery:** (To be determined by UAH, based on scope of work)

12. **F.O.B. Point:** On/Off Campus Site – UAH Financial Data Sheet

13. **Order Address:** The University of Alabama in Huntsville

Office of Sponsored Programs
VBRH E-17
Huntsville, AL 35899
Voice: (256) 824-2660
Fax: (256) 824-6677
Email: troupef@uah.edu

14. **Payment Address:** University of Alabama in Huntsville
Office of the Bursar
UC 214
Huntsville, AL 35899

15. **Warranty:** UAH will perform in accordance with standards of care, skill, diligence consistence with (i) recognized and sound research and development practices, procedures and techniques; (ii) all applicable laws and regulations; (iii) the specifications, documented, and procedures to the resulting contractual agreement; and (iv) the degree of knowledge, skill and judgment normally exercised by professional firms with respect to service/effort of a similar nature.

16. **Export Packing Charges:** No applicable

17. **Terms and Conditions:** UAH General Terms and Conditions

18. **Data Universal Number System (DUNS) Number:** 949687123

17. **POC for CCR Database:** Robert Leonard, Controller and Director of C&G Accounting

Phone: (256) 824-2233 Fax: (256) 824-2687

Email: robert.leonard@uah.edu

UAH registered with CCR in August 1999

The Service Contract Act (SCA) is applicable to this contract as it applies to the entire Professional Engineering Services Schedule and all services provided. While no specific labor categories have been identified as being subject to SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CFR 541.300), this contract still maintains the provisions and protections for SCA eligible labor categories. If and / or when the Contractor adds SCA labor categories / employees to the contract through the modification process, the Contractor must inform the Contracting Officer and establish a SCA matrix identifying the GSA labor category titles, the occupational code, SCA labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.

POSITION DESCRIPTIONS (GSA PES LABOR CATEGORIES)

The University of Alabama in Huntsville is a state funded institution of higher education, with a Carnegie Foundation for the Advancement of Teaching Ranking of "Very High Activity" research category, placing us among a select group of public universities in America with this ranking. Our research endeavors vary greatly according to discipline and research center interest. The University will have the following personnel available to meet the requirements of this contract, either within the organization, or provide evidence that such personnel will be available for performance of the contract (evidence will include written employment commitments). The term "Science" will include: Physics, Chemistry, Mathematics, Computer Science, Information Sciences, and Material Sciences. The term "Engineering" will include: Electrical, Computer, Mechanical, Chemical, Industrial, Manufacturing, System, Aerospace and/or Aeronautical.

SUBJECT MATTER EXPERTS I

Minimum/General Experience: The individual shall have a minimum of ten (10) years experience in area of expertise.

Functional Responsibility: Recognized expert in a specific scientific, engineering or other relevant professional technical field required to support engineering services tasks. Recognized world class authority in the niche area they are being retained to address. The SME initiates and maintains extensive contacts with key engineers/scientists and officials of other organizations and companies, requiring skill in persuasion and negotiation of critical issues.

Minimum Education: Masters degree in engineering, computer science, business, mathematics, or other relevant discipline, or Bachelors with at least twelve (12) years work experience.

SUBJECT MATTER EXPERTS II

Minimum/General Experience: The individual shall have a minimum of twelve (12) years experience in area of expertise.

Functional Responsibility: Recognized expert in a specific scientific, engineering or other relevant professional technical field required to support engineering services tasks. Recognized world class authority in the niche area they are being retained to address. The SME initiates and maintains extensive contacts with key engineers/scientists and officials of other organizations and companies, requiring skill in persuasion and negotiation of critical issues.

Minimum Education: Masters degree in engineering, computer science, business, mathematics, or other relevant discipline, or Bachelors with at least fourteen (14) years work experience.

SUBJECT MATTER EXPERTS III

Minimum/General Experience: The individual shall have a minimum of fifteen (15) years experience in area of expertise.

Functional Responsibility: Recognized expert in a specific scientific, engineering or other relevant professional technical field required to support engineering services tasks. Recognized world class authority in the niche area they are being retained to address. The SME initiates and maintains extensive contacts with key engineers/scientists and officials of other organizations and companies, requiring skill in persuasion and negotiation of critical issues.

Minimum Education: Ph.D. degree in engineering, computer science, business, mathematics, or other relevant discipline, or a Masters with at least seventeen (17) years work experience, or Bachelors degree with at least nineteen (19) years work experience.

PROGRAM DIRECTOR I:

Minimum/General Experience: The individual shall have at least six to eight (6-8) years experience in project management, from concept development through system implementation. The Program Director shall have at minimum six to eight (6-8) years experience with coordinating the technical, financial and administrative aspects of research program development. The individual shall have at least six to eight (6-8) years experience in engineering research activities in the areas of computer-aided design, computer-aided manufacturing, digital simulation, modeling and visualization, robotics, automation, software development, optical fabrication, or materials processing.

Functional Responsibility: The Program Director's functions include the primary responsibility for overall program quality and adherence to customer's expectations. The Program Director shall serve as the primary interface with the government organization and shall have the responsibility to accomplish the administrative and financial requirements of multiple research projects. The Program Director is also required to provide clear and accurate communications to the funding organization as they relate to overall cost, schedule and performance issues.

Minimum Education: The individual shall have, as a minimum, a Doctorate Degree, in Science or Engineering with authoritative knowledge in an engineering related field of research.

PROGRAM DIRECTOR II:

Minimum/General Experience: The individual shall have at least eight to ten (8-10) years experience in project management, from concept development through system implementation. The Program Director shall have at minimum eight to ten (8-10) years experience with coordinating the technical, financial and administrative aspects of research program development. The individual shall have at least eight to ten (8-10) years experience in engineering research activities in the areas of computer-aided design, computer-aided manufacturing, digital simulation, modeling and visualization, robotics, automation, software development, optical fabrication, or materials processing.

Functional Responsibility: The Program Director's functions include the primary responsibility for overall program quality and adherence to customer's expectations. The Program Director shall serve as the primary interface with the government organization and shall have the responsibility to accomplish the administrative and financial requirements of multiple research projects. The Program Director is also required to provide clear and accurate communications to the funding organization as they relate to overall cost, schedule and performance issues.

Minimum Education: The individual shall have, as a minimum, a Doctorate Degree, in Science or Engineering with authoritative knowledge in an engineering related field of research.

PROGRAM DIRECTOR III:

Minimum/General Experience: The individual shall have at least ten to twelve (10-12) years experience in project management, from concept development through system implementation. The Program Director shall have at minimum ten to twelve (10-12) years experience with coordinating the technical, financial and administrative aspects of research program development. The individual shall have at least ten to twelve (10-12) years experience in engineering research activities in the areas of computer-aided design, computer-aided manufacturing, digital simulation, modeling and visualization, robotics, automation, software development, optical fabrication, or materials processing.

Functional Responsibility: The Program Director's functions include the primary responsibility for overall program quality and adherence to customer's expectations. The Program Director shall serve as the primary interface with the government organization and shall have the responsibility to accomplish the administrative and financial requirements of multiple research projects. The Program Director is also required to provide clear and accurate communications to the funding organization as they relate to overall cost, schedule and performance issues.

Minimum Education: The individual shall have, as a minimum, a Doctorate Degree, in Science or Engineering with authoritative knowledge in an engineering related field of research.

PRINCIPLE ENGINEER I:

Minimum/General Experience: The individual shall have a minimum of six to eight (6-8) years experience as the technical lead in an engineering and science project. Expertise shall be required into the state-of-the-art technology issues as related to tools, methodologies and procedures.

Functional Responsibility: The Principle Engineer shall serve as the subject matter expert in matters of engineering technology and application. The Principal Engineer shall serve as the lead technology integrator for systems design and development, and shall provide technical validity to engineering design concepts and methodologies.

Minimum Education: The individual shall have a Doctorate Degree (or Masters Degree with ten (10) years experience or Bachelors Degree with twenty (20) years senior-level experience) in Science or Engineering.

PRINCIPLE ENGINEER II:

Minimum/General Experience: The individual shall have a minimum of eight to ten (8-10) years experience as the technical lead in an engineering and science project. Expertise shall be required into the state-of-the-art technology issues as related to tools, methodologies and procedures.

Functional Responsibility: The Principle Engineer shall serve as the subject matter expert in matters of engineering technology and application. The Principal Engineer shall serve as the lead technology integrator for systems design and development, and shall provide technical validity to engineering design concepts and methodologies.

Minimum Education: The individual shall have a Doctorate Degree (or Masters Degree with ten (10) years experience or Bachelors Degree with twenty (20) years senior-level experience) in Science or Engineering.

PRINCIPLE ENGINEER III:

Minimum/General Experience: The individual shall have a minimum of ten to twelve (10-12) years experience as the technical lead in an engineering and science project. Expertise shall be required into the state-of-the-art technology issues as related to tools, methodologies and procedures.

Functional Responsibility: The Principle Engineer shall serve as the subject matter expert in matters of engineering technology and application. The Principal Engineer shall serve as the lead technology integrator for systems design and development, and shall provide technical validity to engineering design concepts and methodologies.

Minimum Education: The individual shall have a Doctorate Degree (or Masters Degree with ten (10) years experience or Bachelors Degree with twenty (20) years senior-level experience) in Science or Engineering.

PROJECT MANAGER I:

Minimum/General Experience: The individual shall have at least three to five (3-5) years experience in project management, from concept development through system implementation. The Project Manager shall have at minimum three to five (3-5) years experience with coordinating the technical aspects of project leadership.

Functional Responsibility: The Project Manager shall serve as the primary interface to the customer for individual project issues. The Project Manager shall have individual task responsibility, and shall oversee and coordinate the efforts of individual engineers and scientists as they relate to the task performance. The Project Manager shall be responsible for the communication of customer requirements to the engineers and scientists involved in task execution.

Minimum Education: The individual shall have, as a minimum, a Masters Degree, in Science or Engineering or a Bachelors Degree with five (5) years engineering experience.

PROJECT MANAGER II:

Minimum/General Experience: The individual shall have at minimum five (5) years experience in project management, from concept development through system implementation. The Project Manager shall have at minimum five (5) years experience with coordinating the technical aspects of project leadership.

Functional Responsibility: The Project Manager shall serve as the primary interface to the customer for individual project issues. The Project Manager shall have individual task responsibility, and shall oversee and coordinate the efforts of individual engineers and scientists as they relate to the task performance. The Project Manager shall be responsible for the communication of customer requirements to the engineers and scientists involved in task execution.

Minimum Education: The individual shall have, as a minimum, a Masters Degree, in Science or Engineering or a Bachelors Degree with five (5) years engineering experience.

ENGINEER I:

Minimum/General Experience: The individual shall have a minimum of six (6) months demonstrated experience in engineering support activities.

Functional Responsibility: The individual shall provide entry-level support to the Project Manager and other task support staff. The Engineer I shall provide computer support tasks, to include database design, data entry, and task related research.

Minimum Education: The individual shall have a Bachelors Degree in Science or Engineering.

ENGINEER II:

Minimum/General Experience: The individual shall have a minimum of one (1) year demonstrated experience in system design, engineering integration, system performance testing, engineering analysis or information system design applications.

Functional Responsibility: The Engineer II shall be responsible to the Project Manager and shall provide technical support in accomplishing task objectives. The individual shall perform activities related to system design and shall perform engineering design integration, system testing, and data analysis as they relate to research projects. The Engineer II shall be responsible for data gathering, data reduction and information analysis in support to engineering and science tasks.

Minimum Education: The individual shall have, as a minimum, a Bachelors Degree with one (1) year engineering experience.

ENGINEER III:

Minimum/General Experience: The individual shall have a minimum of one (1) year experience in performing the lead role in developing and implementing a complex science or engineering task, and shall have a minimum of three (3) years demonstrated experience in system design, engineering integration, system performance testing, engineering analysis, or information system design applications.

Functional Responsibility: The Engineer III shall be responsible to the Project Manager and shall provide technical guidance in accomplishing task objectives. The individual shall perform activities related to system design and shall be responsible of performing fundamental systems engineering principles. The Engineer III shall perform engineering design integration, system testing, and data analysis as they relate to research projects. The Engineer III shall be knowledgeable of state-of-the-art tools and technologies that are to be employed in task performance.

Minimum Education: The individual shall have, as a minimum, a Masters Degree, in Science or Engineering or a Bachelors Degree with three (3) years engineering experience.

SIMULATION ANALYST I:

Minimum/General Experience: The individual shall have a minimum of six (6) months demonstrated experience in engineering support activities.

Functional Responsibility: The Simulation Analyst shall provide support to the Project Manager and other task support staff. This support shall include data entry, task-related research, software demonstration research and rudimentary system testing.

Minimum Education: The individual shall have upper level class standing (junior or senior) in Science or Engineering with one (1) year experience in an engineering or software-related project.

SIMULATION ANALYST II:

Minimum/General Experience: The individual shall have a minimum of one (1) year demonstrated experience in engineering support activities.

Functional Responsibility: The Simulation Analyst shall provide support to the Project Manager and other task support staff. This support shall include data entry, task-related research, software demonstration research and rudimentary system testing.

Minimum Education: The individual shall have upper level class standing (junior or senior) in Science or Engineering with one (1) year experience in an engineering or software-related project.

ENGINEERING ASSISTANT/TECHNICIAN I:

Minimum/General Experience: The individual shall have a minimum of six (6) months demonstrated experience within a technical environment.

Functional Responsibility: The Engineering Assistant/Technician shall provide rudimentary support to the Project Manager and other task support staff. Their activities shall include computer-related support to include help-desk assistance to the engineers and other research task staff.

Minimum Education: The individual shall be a junior or senior in an Engineering or Science curriculum, or hold a two-year Technology Degree.

ENGINEERING ASSISTANT/TECHNICIAN II:

Minimum/General Experience: The individual shall have a minimum of one (1) year demonstrated experience within a technical environment.

Functional Responsibility: The Engineering Assistant/Technician shall provide rudimentary support to the Project Manager and other task support staff. Their activities shall include computer-related support to include help-desk assistance to the engineers and other research task staff.

Minimum Education: The individual shall be a junior or senior in an Engineering or Science curriculum, or hold a two-year Technology Degree.

JUNIOR ENGINEERING ASSISTANT I:

Minimum/General Experience: The individual shall meet the minimum education requirements and have a minimum three (3) months experience in support activities.

Functional Responsibility: The Junior Engineering Assistant shall perform basic computer-related activities to support the accomplishment of research task objectives. This individual shall work under strict supervision.

Minimum Education: The individual shall be a sophomore or higher in an Engineering or Science curriculum, or hold a two-year technology degree with 0-1 years of hands-on experience.

JUNIOR ENGINEERING ASSISTANT II:

Minimum/General Experience: The individual shall meet the minimum education requirements and have a minimum one (1) year experience in support activities.

Functional Responsibility: The Junior Engineering Assistant shall perform basic computer-related activities to support the accomplishment of research task objectives. This individual shall work under strict supervision.

Minimum Education: The individual shall be a sophomore or higher in an Engineering or Science curriculum, or hold a two-year technology degree with 0-1 years of hands-on experience.
